

Africote: Beautify Your Home

Monday, 14 January 2008

Africote has the décor paint, plaster, coloured screed or natural stone tiles and mosaics to beautify any building both internally or externally.

The comprehensive range of coatings manufactured by Africote include earth toned acrylic paints branded as "Liquid Naturals", "Satin Sheen", "Platinum Sheen", "XP Range", "Roof Paint", "Textured Paint", contractors white PVA interior acrylic, Cementitious Coatings manufactured and branded as "Cement Naturals", for upmarket and commercial use and "Kolorcote T" for low cost housing applications. "Cement Naturals", "Liquid Naturals" and "Kolorcote T" have Quality Agreement Certification which is backed by the CSIR.

Décor plaster such as "Roman Plaster" and "Stucco Plaster" are manufactured and offered in a wide range of colours. Roman Plasters for 3-6 mm thick applications and Stucco Plaster for a cost effective 2-3 mm application on pre-plastered or smooth surfaces can be incorporated with shellac, for a shell like appearance in the plaster.

Special effect décor coatings manufactured include "Rust Paint", "Copper Paint" and "Milk Paint" for wood antiquing. For a marbled acrylic finish, "Distemper" and "Antiquing Liquid Paints" achieve a unique swirled effect in the colour of your choice. "Chemstain" is a chemical induced staining process for concrete walls or floors.

Floor screeds offered include "SL Floor Hardener" in a range of colours in the dry shake application and soon to be released the trowel on S15 Coloured Screed system for 1.5mm to 2mm layer floor screed applications in various colours.

Tiles offered include a comprehensive range of natural stone tiles such as slate, sandstone and travertine. Floor inlays and mosaics in natural stone are available in marble, slate, sandstone and other finishes to beautify any room or façade of a building.

A comprehensive range of sealers for the tiles and coatings are manufactured by the factory including polyurethane, epoxy, and acrylic matt and polymer sealers. S.Q.T. Sealer or Dresser for Natural Stone tiles are also available.

Exterior Exposed Aggregate "Pietra Fina" tiles are hard wearing, low maintenance tiles available in 300x300x25mm and 400x400x32mm modules, utilising natural stone in various colours in crushed 6 mm chips or in a round pebble format, which protrude from the surface to achieve a non-slip texture, ideal for around swimming pools, patio's and outdoor areas.

We offer decorative basins in marble, granite, travertine or glass composition, which are extremely fashionable and suite one's pocket.

Accessories such as umbrella stands clad in marble mosaics, uniquely patterned stepping stones and tiling tools are also just a few of the additional products offered by this unique wall and floor décor specialist company.
